ICPSR 36370

The Effect of Prior Police Contact on Victimization Reporting: Results From the Police-Public Contact and National Crime Victimization Surveys, United States, 2002-2011

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

PER_ID: Person ID

Based upon 105,273 valid cases out of 105,273 total cases.

- Mean: 67761.47
- Minimum: 2.00
- Maximum: 129560.00
- Standard Deviation: 36113.84

Location: 1-6 (width: 6; decimal: 0)
Variable Type: numeric

HH_ID: Household ID

Based upon 105,273 valid cases out of 105,273 total cases.

- Mean: 43434.37
- Minimum: 2.00
- Maximum: 82817.00
- Standard Deviation: 23118.65

Location: 7-11 (width: 5; decimal: 0)
Variable Type: numeric
